HIROTEC AMERICA Announced It Has Partnered with PTC to Bring X-Factory, a Smart Manufacturing System, to LiveWorx 2018

Auburn Hills, MI., June 4, 2018 – HIROTEC Group, a global automotive supplier specializing in the production of body-in-white closures, exhaust systems, and closure manufacturing equipment, announced it has partnered with PTC and other suppliers to develop the X-Factory™, a revolutionary smart manufacturing experience that will be displayed at the LiveWorx® Digital Transformation Conference from June 17th -20th in Boston, Massachusetts.

Through the use of HIROTEC's Mobile Robot, PTC's X-Factory will come alive as a compelling immersive experience, utilizing role-based applications built with the ThingWorx® industrial innovation platform and Vuforia® augmented reality platform. X-Factory takes a user on a comprehensive, full-lifecycle journey, from Engineering to Manufacturing, Testing, and Packaging while engaging with business systems, smart tools, collaborative robots and other equipment.

X-Factory will utilize HIROTEC's Mobile Robot that features an OTTO self-driving vehicle and a Yaskawa Motoman dual-arm manipulator with a goal to achieve total lights-out manufacturing for 365-day, 24/7 operation.

"X-Factory has been a great opportunity and a wonderful learning experience for HIROTEC, and I thank PTC for inviting us to partner with them," said Katsu Uno, HIROTEC AMERICA Chairman and CEO. "Advanced Robotics is a key enabler for Industry 4.0, and as it continues to propel the manufacturing industry forward, HIROTEC is proud to be a part of this 4th industrial revolution."

"HIROTEC is a premier example of an industrial manufacturer on the forefront of digital transformation, and we are delighted with our ongoing partnership. I would also like to thank the HIROTEC team for their important contribution and participation at X-Factory during our LiveWorx event," said Howard Heppelmann, GM, Connected Solutions, PTC.

In addition to the X-Factory demonstration, HIROTEC will also be speaking with attendees on the benefits of utilizing Industry 4.0 solutions.
